

# CANOPY LED

## BRIGHTEN YOUR BRANDS

Outdoor area LED lighting systems capture customer attention with consistent and bright illumination, in addition to providing sizeable energy savings over non-LED fixtures. Our innovative LED lighting systems drive more traffic and energy savings. Unlike outmoded fluorescent and HID systems, LED lighting delivers crisp, uniform illumination that brings out your brand in a way that catches the discerning eye of the customer.

The illuminance patterns show the ability of the Canopy LED Progressive Down Light 2 to achieve the same light levels.

## SEE THE BENEFIT

- Enjoy up to **75% energy savings** compared to incumbent technology
- Safe, inviting environment attracts traffic to the site
- Even light distribution
- Crisp, vibrant colors increase appeal of consumer goods inside the store
- Overall store presentation is updated and improved
- Increases visibility at entrances and from perimeters to the store and canopy
- Longer product life eliminates frequent lamp replacement
- Improved safety – no hot bulbs, broken glass, hazardous materials, or high voltage

**BEEMS** save money. save energy. save the planet.
